

SONNET[®]

Education Partner Program

Sonnet Software takes pride in equipping the next generation of engineers with the precision necessary to explore complex electromagnetic simulations in both academics and research.

Under the Education Partner Program (EPP), Sonnet Software focuses exclusively on academic and research institutes, providing them access to Sonnet's EM software at a reduced price. Participants are qualified according to their affiliation as a university or non-profit organization (NPOs), and receive at minimum a 50% discount on Sonnet Professional Suites. Sonnet's EPP bundles the software to accommodate simultaneous access in classrooms or laboratories, and includes free software upgrades, patches, and technical support for the purchaser.*

Research has always been the driving force behind Sonnet Suites. Sonnet recognizes the innovation that professors and students lend to the world of industry, and wants to propel new engineering discoveries and innovations in laboratories and classrooms across the world. Contact Sonnet's University Representatives today, and join hundreds of institutions worldwide in exploring the analytic precision and capability of Sonnet Suites.

*Restrictions occur with certain bundles purchased under the EPP.

Compile Data through:

- S-, Y-, Z- parameter outputs
- Model Extraction
- Causal Broadband Spice Extraction
- Programmatic automatization of simulations with SonnetLab for MATLAB[®]

Explore Core Concepts through:

- Data plots, diagrams, and 3D circuit views
- Mapping intricate circuit layouts
- Exploring conductor current and charge densities
- Analyzing complex electromagnetic data
- Displaying far-field radiation patterns
